Of
Sheffield.

EPSRC CDT in Advanced Biomedical Materials

Training the next generation of
biomedical materials scientists

EPSRC CDT in Advanced Biomedical Materials

Training the next generation of
biomedical materials scientists

**Fully-funded studentships are available on our four-year
PhD programme – Apply now!**

Would you like to help generate life-changing research to improve the health quality of a rapidly growing and ageing population? If so, our Advanced Biomedical Materials (ABM) Centre for Doctoral Training (CDT) could be the right place for you.

We offer you the chance to work on projects tackling global healthcare challenges alongside world-leading academics and industry partners. Take a look and apply for one of these projects: <https://bit.ly/3D4JNjD>

What you will be doing:

- + Developing and translating smart, responsive biomaterials;
- + Driving innovation between industry, clinicians and academics;
- + Working alongside leading industry partners;
- + Learning from experts at The University of Manchester and The University of Sheffield;
- + Accessing world-class facilities including the Henry Royce Institutes in both Manchester and Sheffield.

Potential applicants:

- + We welcome applications from a variety of discipline backgrounds, including biology, materials, physics, maths and chemistry.
- + We support an inclusive environment and welcome applicants from all sections of the community regardless of age, disability, ethnicity, gender, gender expression, religion or belief, sex, sexual orientation and transgender status.
